Analysis of Measures

Count of Attacktype	181,691
Count of globalterrorismdb_0718dist.csv	181,691
Count of Country	181,691
Count of Iday	181,691
Count of Imonth	181,691
Count of Killed	181,691
Count of Latitude	177,135
Count of Longitude	177,134
Count of Targtype1	181,691
Count of Wounded	181,691
Count of Iyear	181,691
Count of Nkill	171,378
Count of Nwound	165,378

Count of Attacktype, count of globalterrorismdb_0718dist.csv, count of Country, count of Iday, count of Imonth, count of Killed, count of Latitude, count of Longitude, count of Targtype1, count of Wounded, count of Iyear, count of Nkill and count of Nwound.

Stats of AttackType

Avg. Attacktype	3
Count of Attacktype	181,691
Min. Attacktype	1
Max. Attacktype	9
Percentile (25) of Attackt..	2
Percentile (50) of Attackt..	3
Percentile (75) of Attackt..	3
Std. dev. of Attacktype	2

Avg. Attacktype, count of Attacktype, Max. Attacktype, Min. Attacktype, Percentile (25) of Attacktype, Percentile (50) of Attacktype, Percentile (75) of Attacktype and Std. dev. of Attacktype.

Stats of People Killed

Count of Killed	181,691
Avg. Killed	2
Min. Killed	0
Max. Killed	1,570
Percentile (25) of Killed	0
Percentile (50) of Killed	0
Percentile (75) of Killed	2
Std. dev. of Killed	11

Count of Killed, Avg. Killed, Min.
Killed, Max. Killed, Percentile (25)
of Killed, Percentile (50) of Killed,
Percentile (75) of Killed and Std.
dev. of Killed.

Stats of People
Wounded

Count of Wounded	181,691
Avg. Wounded	3
Min. Wounded	0
Max. Wounded	8,191
Percentile (25) of Wounded	0
Percentile (50) of Wounded	0
Percentile (75) of Wounded	2
Std. dev. of Wounded	34

Count of Wounded, Avg. Wounded,
Min. Wounded, Max. Wounded,
Percentile (25) of Wounded, Percentile
(50) of Wounded, Percentile (75) of
Wounded and Std. dev. of Wounded.

Trend Analysis of Terrorist Incidents Over Time

This line chart shows the trend of terrorist incidents over time. The x-axis represents the year and the y-axis represents the number of incidents. It is interesting to note that the number of terrorist incidents has steadily increased from 1970 to 1992, followed by a gradual dip until 1998. The year 2014 saw a large number of terrorist incidents.

Top 10 Most Affected Cities

This horizontal bar chart shows the top 10 most affected cities by global terrorist attacks. The chart is sorted by the number of attacks, with Baghdad being the most affected city. The x-axis shows the number of attacks, while the y-axis shows the city names. The top three most affected cities are Baghdad, Lima, and Mosul.

Types of Attacks and Their Frequencies

The pie chart shows the types of attacks and their frequencies. The colours represent the Attacktype. The largest section is red and represents "Bombing/Explosion" with a frequency of 264,765. The second largest section is blue and represents "Armed Assault" with a frequency of 85,338. The smallest section is green and represents "Hijacking" with a frequency of 2636.

Analysis of Casualties in Terrorist Incidents

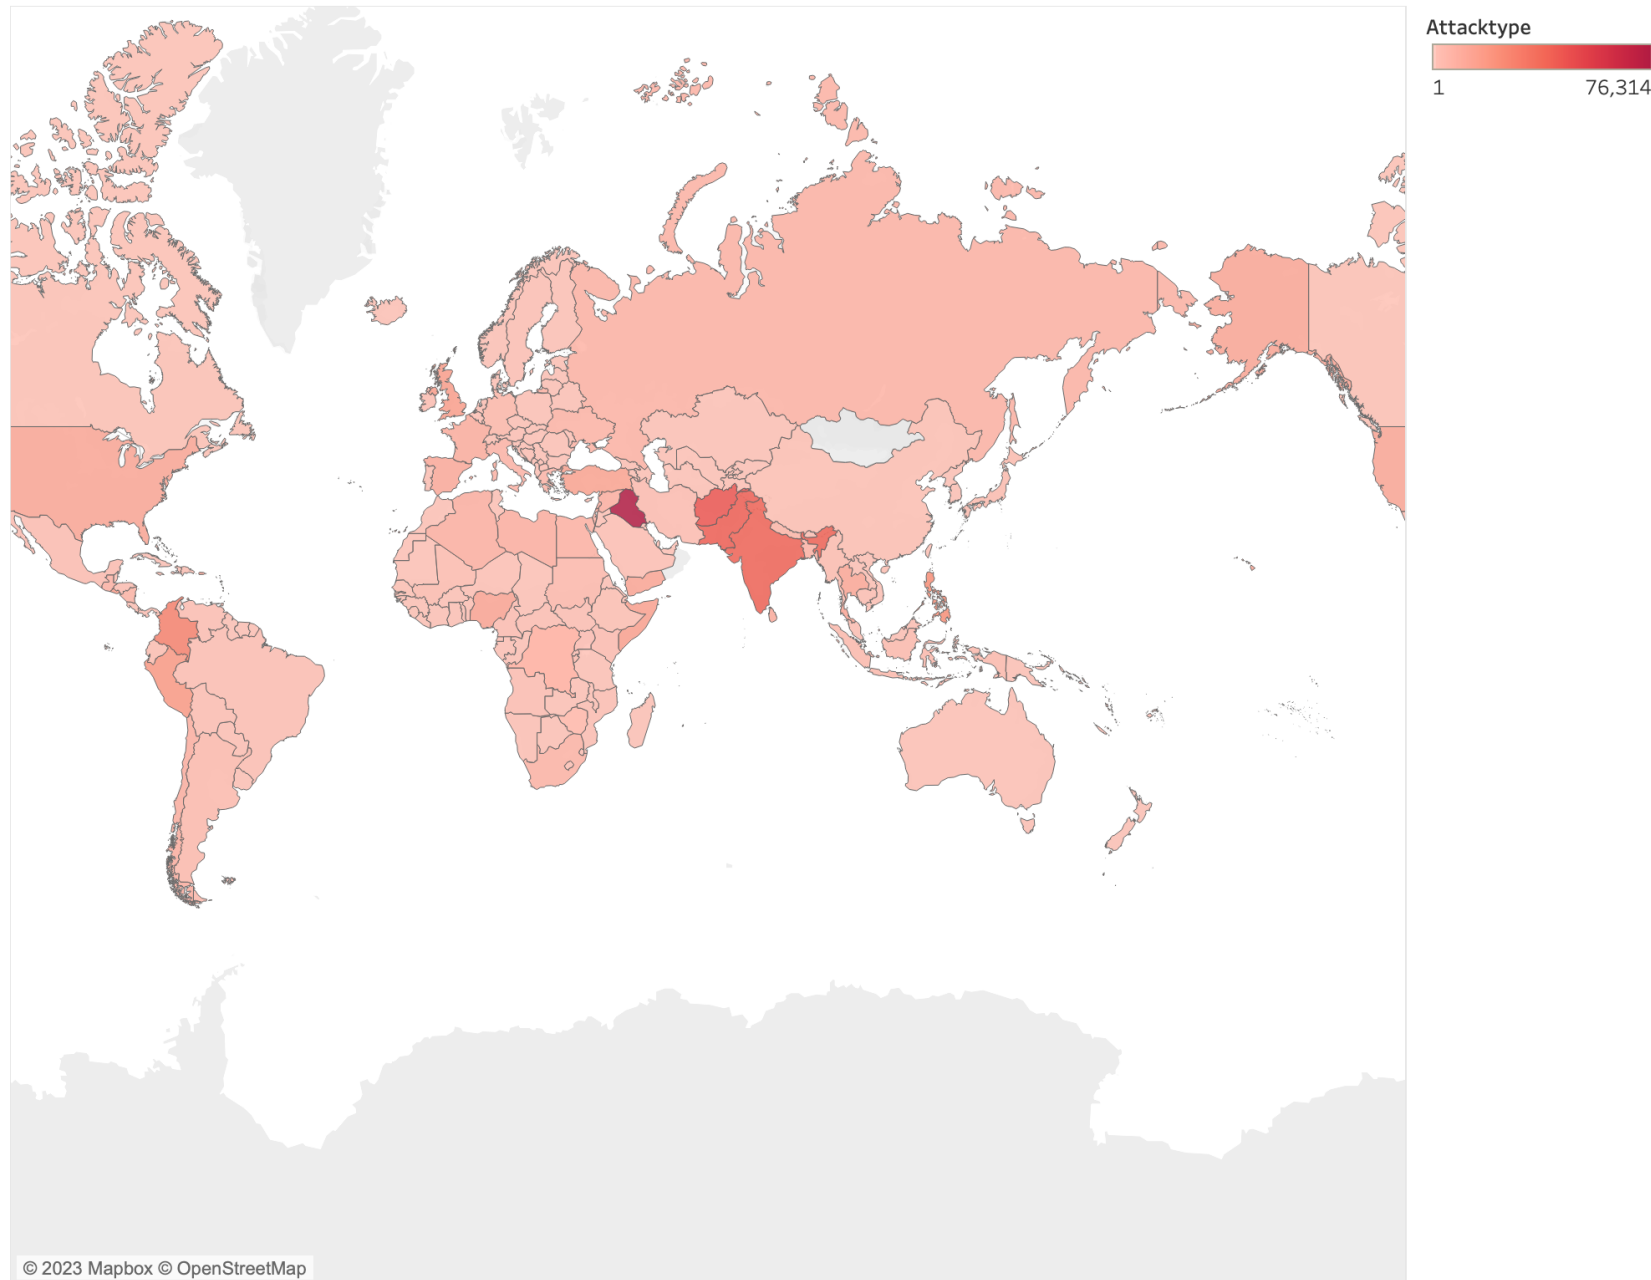

The Bubble chart displays data in bubble format, where each circle represents the Attacktype, and its size depends on the measure of people who are wounded. The tooltip represents the number of people killed and number of people wounded in each of the Attack type. The bubble chart that analyzes casualties in terrorist incidents is divided into 9 bubbles of varying sizes and colors. The largest bubble is dark red and represents bombing/explosion incidents. The second largest bubble is orange and represents armed assault incidents. The chart has a legend on the right side that shows the sum of wounded individuals in each incident type.

Target Types in Terrorist Attacks

The horizontal bar chart represents the Target types in Terrorist Attacks, and are arranged in descending order. The x-axis represents the "Attacktype" and the y-axis represents the "Targettype". The highest bar is "Private Citizens & Property" followed by "Military" and "Business". The lowest bar is "Abortion Related" followed by "Maritime" and "Food or Water Supply". The bars are labeled with the target type and the number of attacks.

Geographical Distribution of Attacks

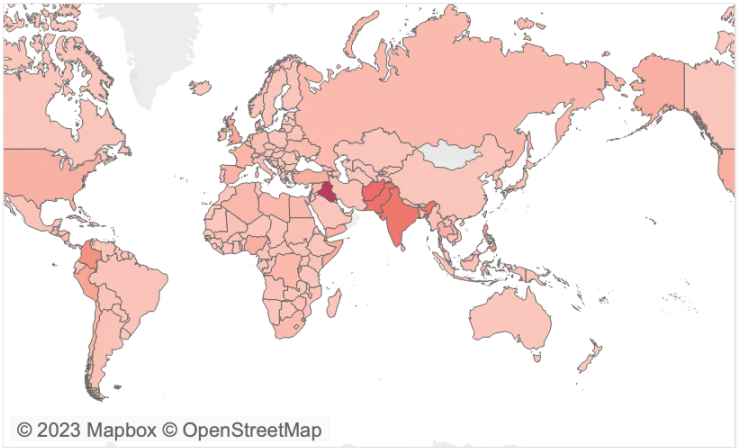

This map represents the "Geographical Distribution of Attacks". The legend denotes the attacks in red palette, with darker colors representing higher attack counts in that country. It is interesting to note that Iraq has the highest attack count of 76,314, followed by Afghanistan with 45,334 attack count, then comes Pakistan with 41,992 attack count, and India with 40,492 attack count.
